solo performance
Techrider
2011

A competent technical crew shall be present from the load in until the end of the show, to assist in the stage set-up, and operation of the audio and video system. Any changes to this rider should be agreed well before the show, please send any questions or comments regarding this rider to : **seifert@randomstudios.org**

P.A SYSTEM :

A professional quality stereo system, 3 or 4 ways, subs and mid-hi speakers each side, suited to the venue (L-acoustics, Meyer, d&b, or equivalent). The system should render a clear sound, with no noise, in the frequency range 20-20.000 Hz. The system should cover the entire audience area and produce a minimum sound pressure of 110 dbA at FOH position All inputs must be line-checked and the FOH and monitor systems must be fully functional and in a showready state. It is expected that all sound equipment provided is of professional quality, in perfect working condition, producing no hiss, buzz, hums, or clics. Please check especially all electrical circuits to avoid interferences and loops with electronic devices.

MONITORS :

2 stage monitors Left / Right : main stereo mix

INPUT / OUTPUT :

1 stereo output (main out), # 2x XLR balanced please provide cables from stage mixer to P.A mixing console, via D.I if relevant processing : linked channels / compressor / eq

STAGE / ELECTRICAL OUTLETS :

minimum stage area : 2m x 2m 2x electrical power outlet (AC-240v, european standard plugs), . power converters if relevant.

SOUND CHECK / REHARSAL :

A minimum of # 1hour for soundcheck prior to doors is required. This 1 hour period begins after all backline gear is in position and operational on stage.Sufficient personnel shall be present to assist in the sound check and, if needed, make adjustments.

BACKLINE / TECH REQUEST :
